

# Youssef Sayed

Backend Developer

Mob: +201122917397 | +201018169667

Email: [sayedyousef775@gmail.com](mailto:sayedyousef775@gmail.com)

Address: Cairo, Egypt

## Summary

---

PHP Laravel Backend Developer skilled in building secure and efficient web applications. Proficient in RESTful API design, SQL schema optimization, and backend architecture with a focus on scalability and maintainability. Strong knowledge of front-end technologies like JavaScript, HTML5, CSS3, and a solid understanding of OOP principles and SOLID design patterns. Dedicated to delivering clean, well-documented, and high-performance code.

## Education

---

Bachelor's degree in computer science Obour High Institute for Management & Informatics & Technology| 09/2020 – 07/2024

## Experience

---

Backend Developer

*Evyx | July 2024 – Present*

Henta – [\[Website\]](#) [\[Mobile\]](#)

- Technologies Used: PHP, MySQL, Laravel, Bootstrap, jQuery
- Developed a mobile application for managing books, including features for browsing, purchasing, and organizing book collections.
- Implemented multi-authentication functionality to support different user roles securely.
- Integrated a payment system for seamless online transactions.

#### **EGY-PEN – [\[Website\]](#) [\[Mobile\]](#)**

- **Technologies Used: PHP, MySQL, Laravel, Laravel Nova**
- **Built a platform for showcasing and exploring tourist attractions.**
- **Developed features for users to list their tourist spots through paid subscriptions.**
- **Enabled tourists to browse and discover locations using an interactive map powered by Google Maps API.**

#### **[رابطه تجار مصر](#)**

- **Technologies Used: PHP, MySQL, Laravel, Laravel Nova**
- **Developed a platform for connecting top car dealers and showrooms in Egypt.**
- **Enabled users to showcase and sell new and used cars, fostering competition among sellers.**
- **Integrated payment gateways for secure transactions and subscription management**

#### **Caeser – [\[Mobile\]](#)**

- **Technologies Used: PHP, Laravel, Laravel Nova**
- **A dedicated app for Caesar Agency to sell car spare parts and display branches based on user location.**
- **Provides a point redemption system, allowing users to earn rewards for their purchases.**
- **Supports services like tow trucks and roadside assistance, displaying their locations on the map**
- **User-friendly interface with full support for Arabic and English languages**

#### **Maxliss – [\[Website\]](#) [\[Mobile Expert Salon\]](#)**

- **Technologies Used: PHP, Laravel, WebSocket**
- **An app for booking a specialist for hair protein treatment based on hair condition.**
- **Provides a tracking system for specialists to ensure their safety.**
- **Supports salon reservations for a variety of beauty services.**
- **Includes live chat and SOS emergency features for a secure and seamless experience.**

### **Hesperdes – [[Website](#)]**

- **Technologies Used: PHP, Laravel, Laravel Nova, React**
- **A university platform that allows admins to fully manage content from the dashboard.**
- **Developed an API to connect the backend with the React-based frontend.**
- **A flexible CMS system that enables easy customization and management of all site elements.**
- **Modern and responsive UI providing a seamless experience for students and administration.**

### **Empon – Under development**

- **Technologies Used: PHP, Laravel, Laravel Nova, WebSocket**
- **A Facebook-like marketplace that allows users to list and sell products.**
- **Supports product interactions through likes and comments, with online sales or direct contact options**
- **Enables business account creation, following accounts, and sending user notifications**
- **Flexible authentication system supporting email, alternative email, or phone login with OTP via Gmail or WhatsApp.**
- **Integrated real-time chat system for seamless user communication**

### **PHP&MYSQL Instructor**

#### **ATEC Center | Apr 2022 – May 2024**

- **Delivered a structured PHP & MySQL course, enabling students to grasp core web development concepts and practical coding skills.**
- **Built a dynamic blog system backend using PHP, incorporating CRUD operations, secure user authentication, and real-time comment functionality.**

## Freelance Projects

---

### 1. Stoonstore – [\[Website\]](#)

- **Technologies Used:** PHP Native, MySQL, Bootstrap, jQuery
- **Built a system for managing store operations, including inventory, orders, and delivery.**
- **Added reports to track sales, stock, and delivery performance**

### 2. Net Go – [\[Demo Website\]](#) [\[Website\]](#) [\[Mobile \(under development\)\]](#)

- **Net Go** is an innovative platform that allows users to purchase and activate **eSIMs** easily while traveling.
- The platform is integrated with **Airalo** to offer **eSIM** options from various countries at competitive prices
- The system supports **Click Pay** Saudi Arabia as a secure and fast online payment gateway.
- The project features a simple and user-friendly interface for a seamless user experience.
- Net Go provides notifications for **eSIM** status and easy balance management.

## Languages

---

- **Arabic:** Native
- **English:** Good

## Technical skills

---

- **Languages:** PHP, JavaScript, SQL, C#, HTML, CSS
- **Frameworks:** Laravel, Bootstrap
- **Tools:** **Visual Studio Code**, Postman, Git, JIRA,
- **APIs and Data Technologies:** RESTful APIs, AJAX
- **Databases:** MySQL
